

The modular design of the CAP577 Softwall Cleanroom makes future additions simple and economical

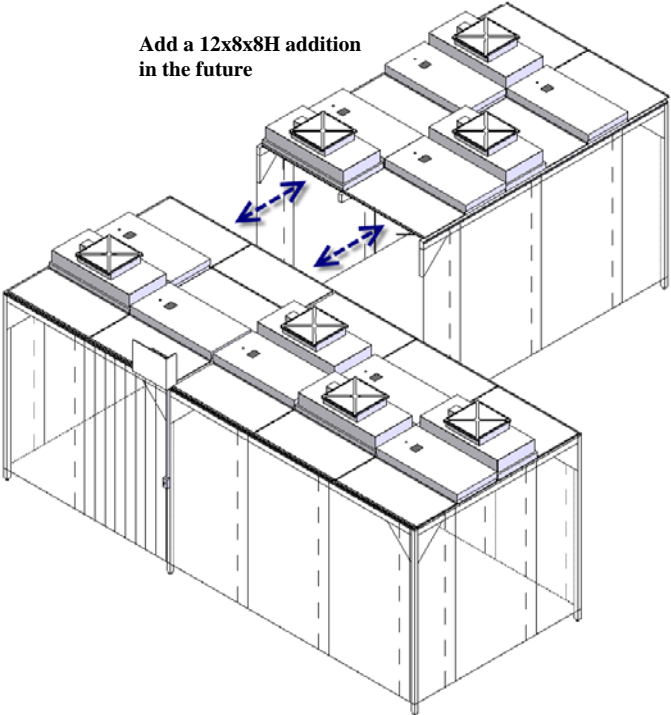

Start with a small 8x8x8H room

Add an 8x12x8H addition in the future

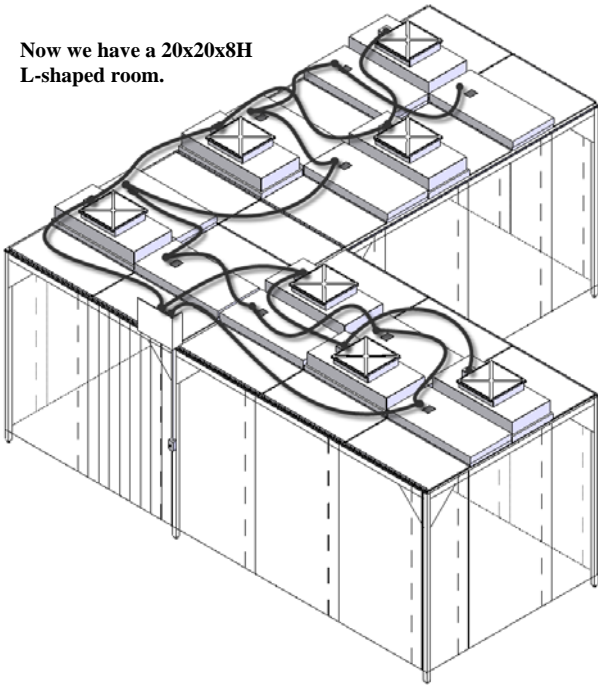

Now we have an 8x20x8H room.

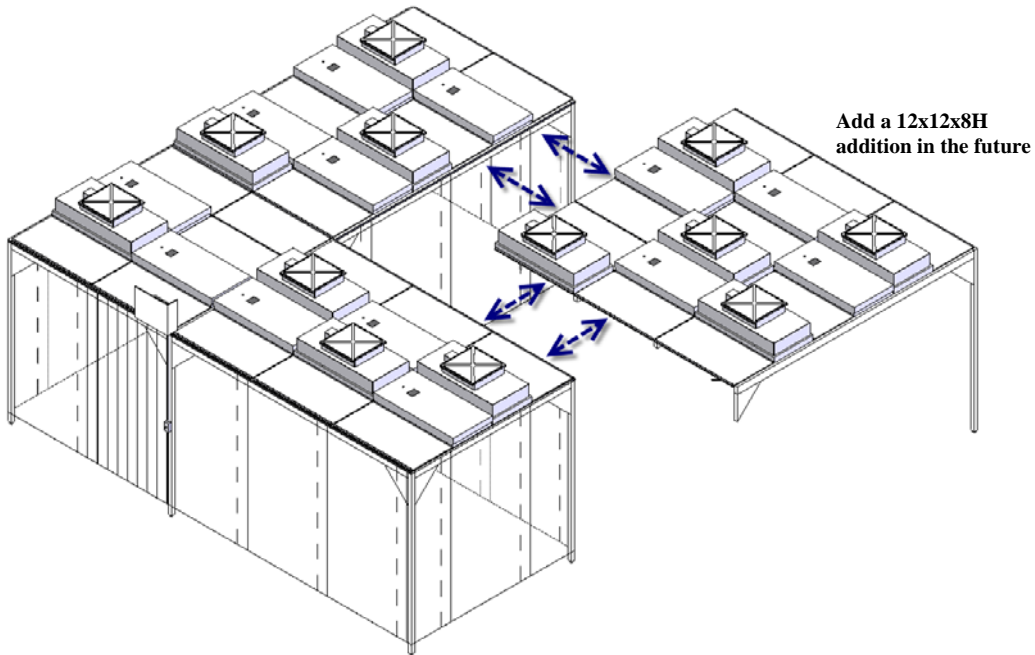

Add a 12x8x8H addition in the future

Note that we were able to use the curtains from one wall of the original 8x8x8H room on the end of the new addition. Also we were able to add the filters and lights to the existing Prefab Wiring Kit Option.

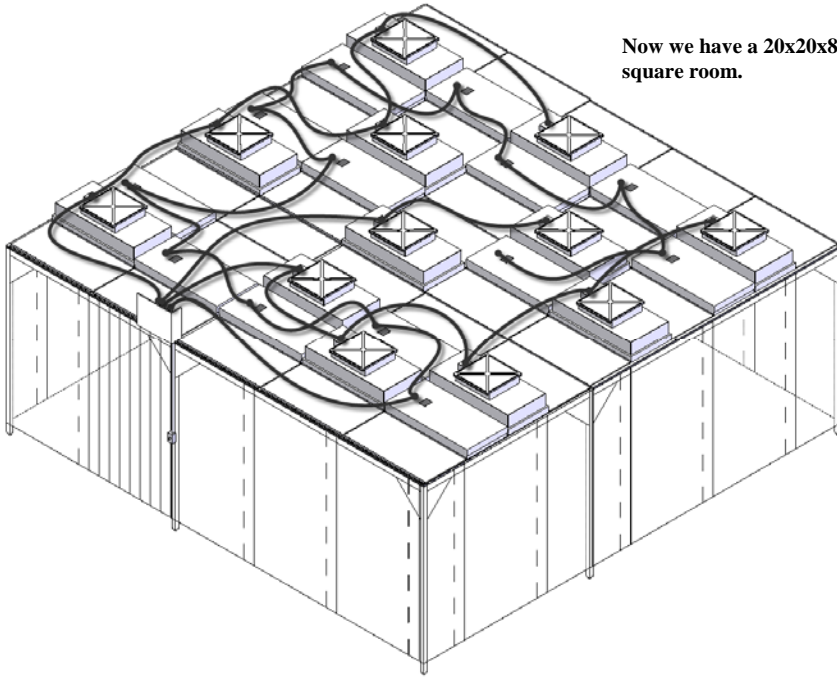

Now we have a 20x20x8H L-shaped room.

Once again we were able to use the curtains from one wall of the original 8x8x8H room on the end of the new addition. Also we were able to add the filters and lights to the existing Prefab Wiring Kit Option.

Now we have a 20x20x8H square room.

Once again we were able to use curtains from the existing room additions on the ends of the new addition. Also we were able to add the filters and lights to the existing Prefab Wiring Kit Option.
